CRAFTERS & SEWERS - YOUR PERSONAL CARE KITS ARE CHANGING GIRLS LIVES

Imagine you are a young girl in Tanzania, bright and so eager to get a good education as you know this is the only way out of the poverty and hard life you were born into. Then imagine the frustration of losing several days of school each month because you do not have reliable sanitary supplies and are confined to your home, watching all your male classmates attend full time and surge ahead with their schooling. This is the reality for thousands of orphan school girls that Tumaini is supporting in Kagera. BUT - since 2012, Tumaini volunteer crafters and sewers have been dedicated to producing the washable hygiene kits which enable the girls to attend school every day of the month. The delight of the girls when they receive their kit is shown on the faces of these Secondary School students in a May 2017 distribution of kits from Canada, Norway and Guernsey.

Smiles speak a thousand words of thanks!

Each girl has an equal opportunity to excel at school.

She can participate in all activities without shame or embarrassment.

Truly life changing

Thank you Crafters and Sewers

The ripples of your work spread wider than you can imagine!
