DISTRIBUTION OF SOLAR LAMPS
gifted by
CANADIAN DONORS : November 2016

The Kitushya Secondary School is located in the Mwivuza village, in the Kirushya ward of Ngara in Kagera, Tanzania.

The gift of a solar lamp will make a wonderful difference in the family lives of these students at this school.

At the end of their school day, many students face a long walk home and the first priority during daylight hours is always caring for crops and livestock.

As darkness falls, their next priority is their homework - so essential for these students who are so eager to get a good education for a better future - but so difficult without light in their homes. This all changes with their new solar lamps !

For the parents of these students, the solar lamps enable crafts and home businesses, such as tailoring, dressmaking and basketry, to be carried out during the evening hours. This brings in vital household income and less dependence on unreliable subsistence farming for the family's survival.

Truly a life changing gift for the cost for each lamp of \$20.
